WHY SHOULD YOU CARE?

你为什么要关心？

- You are a researcher!
 - You want to make sure the information you find is accurate, updated, and relevant to your research.
 - You can find multiple opinions, but be aware of their biases.
- 你是一名研究员！
 - 你要确保您找到的信息是准确的、最新的，并且与你的研究相关。
 - 你可以找到多种观点，但要注意他们的偏见。

Introduction

An instrument designed for the simultaneous transmission and reception of the human voice, the telephone has become the most widely used telecommunications device in the world. Today, portable cellular telephones, or simply cell phones, are nearly ubiquitous in many countries. The modern digital cell phone is capable of providing numerous features in addition to voice transmission, including camera and video functions, game and music players, and Internet connectivity. Even traditional analog telephones offer features such as automatic redialing, caller identification, call waiting, and call forwarding in addition to basic voice connections.

The telephone first appeared in the late 19th century as a largely mechanical

EVIDENCE 证据

Fact 22: Who invented the Telephone? Alexander Graham Bell also continued his work with the deaf and established the American Association to Promote Teaching of Speech to the Deaf in 1890.

Fact 23: Who invented the Telephone? In January 1915 Alexander Graham Bell made the first transcontinental phone call from New York speaking to Thomas Watson in San Francisco.

Fact 24: Who invented the Telephone? Alexander Graham Bell died on August 2, 1922 at Baddeck, Nova Scotia, Canada. He will forever be remembered as the inventor of the telephone. It was nearly 100 years after the invention of the telephone that Martin Cooper invented the [Cell Phone](#) in 1973. The [Smartphone](#) was invented in 1992 at IBM.
